

Fall 2016 Environmental Sciences Seminar Series
Fridays at 2:30 pm McConnell Hall, Room 220

Dr. Elizabeth Craig

Dr. Brett Huggett

Dr. Arthur Gold

September 9	Seabird Conservation at Shoals Marine Laboratory Dr. Elizabeth Craig , Research Associate - Shoals Marine Laboratory
September 16	Filters for Fungi: How Space, Time, and the Environment Control Distribution of Fungi on Land Dr. Jennifer Talbot , Assistant Professor of Biology - Boston University
September 23	How Satellite Imagery is Changing Ecological Research in the Southern Ocean Dr. Michelle LaRue , Research Ecologist - University of Minnesota
September 30	Surface Climate Impacts of Forest Cover in New England Dr. Elizabeth Burakowski , Research Assistant Professor - University of New Hampshire (NRESS Alum)
October 7	River Restoration by Dam Removal in New England Dr. Francis Magilligan , Professor of Geography - Dartmouth College
October 14	Will Dam Removal Increase Nitrogen Flux to Estuaries? Dr. Arthur Gold , Professor and Chair, Natural Resources Science - University of Rhode Island
October 21	Comparative Community Ecology of Mojave Desert Rodents: Phylogenetic Structure, Spatio- Environmental Gradients and Metacommunity Dynamics Dr. Richard Stevens , Associate Professor - Texas Tech University
October 28	Plants Going Rogue: Using Plant Invasions to Assess Ecological 'Rules' Dr. Ylva Lekberg , Adjunct Assistant Professor of Soil Community Ecology - University of Montana
November 4	Theories of Natural Resource Governance: A Synthesis Dr. Michael Cox , Assistant Professor of Environmental Studies - Dartmouth
November 18	Evolutionary Ecology of Risk on Rocky Shores: Effects of Prey State and Environmental Context Dr. Geoffrey Trussell , Professor Marine and Environmental Sciences - Northeastern University
December 2	Understanding the Physiological Responses of Trees to Biotic/Abiotic Stress Dr. Brett Huggett , Assistant Professor - Bates College
